

This listing of claims will replace all prior versions, and listings, of claims in the application:

LISTING OF CLAIMS

1. (Canceled)

2. (Canceled)

3. (Canceled)

4. (Currently amended) An image capturing apparatus as claimed in claim 4 22,
wherein:

said first image capturing device is used for still image recording, and

said second image capturing device is used for capturing moving images;

said second image capturing device also providing preliminary measurement for use in
still image recording.

5. (Currently amended) An image capturing apparatus as claimed in claim 2 23,
wherein:

said first image capturing device is used for still image recording, and

said second image capturing device is used for capturing moving images;

said second image capturing device also providing preliminary measurement for use in
still image recording.

6. (Currently amended) An image capturing apparatus as claimed in claim 3 24,
wherein:

said first image capturing device is used for still image recording, and

said second image capturing device is used for capturing moving images;

said second image capturing device also providing preliminary measurement for use in
still image recording.

7. (Currently amended) An image capturing apparatus as claimed in claim 1 22, further comprising:

~~at least one~~ said first and second optical ~~system for systems~~ directing light representing an image of a subject to said first and said second image capturing ~~means~~ devices;

a said recording means for recording data of images captured by said first image capturing ~~means~~ device as still images and for recording data of images captured by said second image capturing ~~means~~ device as moving images; and

a display means for displaying image data.

8. (Currently amended) An image capturing apparatus as claimed in claim 2 23, further comprising:

~~at least one~~ said first and second optical ~~system for systems~~ directing light representing an image of a subject to said first and said second image capturing ~~means~~ devices;

a said recording means for recording data of images captured by said first image capturing ~~means~~ device as still images and for recording data of images captured by said second image capturing ~~means~~ device as moving images; and

a display means for displaying image data.

9. (Currently amended) An image capturing apparatus as claimed in claim 3 24, further comprising:

~~at least one~~ said first and second optical ~~system for systems~~ directing light representing an image of a subject to said first and said second image capturing ~~means~~ devices;

a said recording means for recording data of images captured by said first image capturing ~~means~~ device as still images and for recording data of images captured by said second image capturing ~~means~~ device as moving images; and

a display means for displaying image data.

10. (Currently amended) An image capturing apparatus as claimed in claim 4, further comprising:

~~at least one~~ said first and second optical ~~system for~~ systems directing light representing an image of a subject to said first and said second image capturing ~~means~~ devices;

a said recording means for recording data of images captured by said first image capturing ~~means~~ device as still images and for recording data of images captured by said second image capturing ~~means~~ device as moving images; and

a display means for displaying image data.

11. (Currently amended) An image capturing apparatus as claimed in claim 5, further comprising:

~~at least one~~ said first and second optical ~~system for~~ systems directing light representing an image of a subject to said first and second image capturing ~~means~~ devices;

a said recording means for recording data of images captured by said first image capturing ~~means~~ device as still images and for recording data of images captured by said second image capturing ~~means~~ device as moving images; and

a display means for displaying image data.

12. (Currently amended) An image capturing apparatus as claimed in claim 6, further comprising:

~~at least one~~ said first and second optical ~~system for~~ systems directing light representing an image of a subject to said first and second image capturing ~~means~~ devices;

a said recording means for recording data of images captured by said first image capturing ~~means~~ device as still images and for recording data of images captured by said second image capturing ~~means~~ device as moving images; and

a display means for displaying image data.

13. (Currently amended) An image capturing apparatus as claimed in claim 1 22, wherein said first image capturing ~~means~~ device is a CCD solid image capturing device of the full-frame transfer type.

14. (Currently amended) An image capturing apparatus as claimed in claim 2 23, wherein said first image capturing ~~means~~ device is a CCD solid image capturing device of the full-frame transfer type.

15. (Currently amended) An image capturing apparatus as claimed in claim 3 24, wherein said first image capturing ~~means~~ device is a CCD solid image capturing device of the full-frame transfer type.

16. (Currently amended) An image capturing apparatus as claimed in claim 1 22, wherein said second image capturing ~~means~~ device includes a CMOS-type solid image capturing device.

17. (Currently amended) An image capturing apparatus as claimed in claim 2 23, wherein said second image capturing ~~means~~ device includes CMOS-type solid image capturing device.

18. (Currently amended) An image capturing apparatus as claimed in claim 3 24, wherein said second image capturing ~~means~~ device includes a CMOS-type solid image capturing device.

19. (Canceled)

20. (Canceled)

21. (Canceled)

~~said image capturing apparatus includes~~ a first optical system and a second optical system;

said first optical system supplying image data to said first image capturing ~~means~~ device;

said second optical system supplying image data to said second image capturing ~~means~~ device; and

said processing means correcting a difference in image capturing position between said first optical system and said second optical system.

24. (Currently amended) An image capturing apparatus ~~as claimed in claim 3, wherein~~ comprising:

a first image capturing device;

a second image capturing device having characteristics different from those of said first image capturing device;

a recording means for recording image data;

a processing means for processing data of images captured by said first image capturing device as still images and data of images captured by said second image capturing device as moving images;

~~said image capturing apparatus includes~~ a first optical system and a second optical system;

said first optical system supplying image data to said first image capturing ~~means~~ device;

said second optical system supplying image data to said second image capturing ~~means~~ device; and

said processing means correcting a difference in image capturing position between said first optical system and said second optical system.

25. (Currently amended) An image capturing apparatus according to claim 4 22, wherein:

~~said image capturing apparatus including first and second optical systems;~~

~~said first optical system supplying image data to said first image capturing device;~~

~~said second optical system supplying image data to said second image capturing device;~~
said first and second optical systems having lines of sight displaced a distance apart; and
said processing means including means for calculating a range to an object based on known parameters of said distance and a zoomed field angle.

26. (Currently amended) An image capturing apparatus according to claim + 22, wherein:

~~said image capturing apparatus including first and second optical systems;~~
~~said first optical system supplying image data to said first image capturing device;~~
~~said second optical system supplying image data to said second image capturing device;~~
said first and second optical systems having lines of sight displaced a distance apart; and
said processing means including means for adjusting at least one of a dimension and a lateral displacement of an image captured by one of said first and second image capturing devices to match an image captured by the other thereof.
